

Dry Vapor Systems 25

DVS25-B (WITH 12VDC PLUG)

Introducing the DVS25-B: A more agile version of our powerful odor removing equipment.

Designed specifically for automotive use.

The DVS25 was developed as a “dry” dispersion system for the application of Fresh Wave IAQ® Air & Surface and Smoke Away natural odor eliminating products. Easily & quickly eliminate severe odors impacting, guests, staff, residents, patients & customers.

Use the easy-lift handle to move the unit from storage to treatment location. Turn on, and let it eliminate rather than “mask” tough odors.

PERFECT FOR:

Rental Agencies

Detailers

FEATURES OF DVS25-B

- Compact and easy to store
- Portable and lightweight
- Safer than Ozone generators
- Durable construction - Rotomolded plastic
- Visible sight window allows for clear view of Fresh Wave IAQ liquid level
- Attached elbow cap prevents spillage when unit is transported
- Modified fan louvers increase air flow and reduce operating noise
- Programmable timer or manual setting modes allows for multiple control options
 - Timer settings up to 999 minutes

SPECIFICATIONS

Item #	A3025BAAA00
